Words and Wit, LLC (www.WordsAndWit.com) is excited to announce that in addition to their regular workshop, "Words and Wits Ways to Get Your Point Across," they will be introducing the following workshop at the Orlando Chapter meeting.

Here is some help for you if you are struggling with the new interface, or if you plan on moving to Word 2007 from an earlier version. The first thing you notice about Word is the radically different interface (officially known as Microsoft Office 2007). The online help is there, but a dedicated new tab page. Another major shift is the move toward contextual commands. For example, when your insert point is in a field, the tab on the ribbon (officially known as the "ribbon") changes to look like a toolbar, with a drop-down list that says "Fields." When you click on the drop-down list, you can choose from the list of all the fields you can use in a document. The shortcut keys work the same as in previous versions of Word.
